

Clark Forklift Parts

Clark Forklift Parts - Performing worldwide, there are currently 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in use in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 unique models of forklifts, with components covering more than 120,000 specialized components for all of its automated equipment. Your local Clark Dealer is your total source for availability of all your components needs provided by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a really impressive international support network. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

Clark proudly remains an progressive leader of the industrial equipment industry, pioneering safety features such as the operator restraint system. This exceptional dedication to safety is at this time a standard feature on every forklift.

Clark's relentless effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift manufacturer across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any environmental restrictions, thus placing them in a prevailing market position.

Clark has selected the very economical and beneficial structure of "Lean Manufacturing" for its assembly facilities and application of resources. This structure was established to acknowledge the most efficient method of production facility management and ensuring maximum efficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to perfect the proficiency and excellence of their products while minimizing expenses. The contemporary value engineering agenda combines modern product improvement and provides superior consumer support and service within the industry.
